

## CUSTOM AND WATERFRONT HOMES

At JLS Design-Construction, Inc. we work with your clients to create their dream home. Our in-house architectural service allows modifications to existing plans or start with a new home design. Our goal is to create a design in which your client is 100% satisfied.

The team will insure that every feature of your client's new home has been properly integrated into the plans/drawings.

Handle all permitting to reduce the time your client needs to spend on the project.

Manage our projects with experienced precision to allow for quicker than normal completion of your client's home.

**Our goal during construction is to create a smooth, enjoyable experience.**

*We specialize in creating homes which fit their environment and create a sense of home.*

JLS Design-Construction, Inc has built more waterfront homes in the past 3 years than any other builder in Kent or Queen Anne's County. We understand a waterfront home is a unique project requiring great attention to detail. Contact us to see why our Design/Build services are superior.
