

BUILDING GREEN

What Does Clean Green Mean To You?

- **Energy Star Appliances** save money, save water, and help save the environment.
- **High Energy efficient HVAC** systems included, and duct work is insulated, taped and sealed, reducing energy loss. 14 SEER
- **Energy Star** air conditioning. (Some models have multiple zones)
- Framing materials come from **“Forest Stewardship Council” certified forest**, ensuring that trees are being harvested in an environmentally responsible, socially beneficial and economically viable manner.
- **MasterBrand cabinets** are certified and approved by the Kitchen Cabinets Manufacturers Association’s (KCMA)
- **Environment Stewardship Program.**
- Compact fluorescent light bulbs in recessed and other light fixtures **use about 75% less energy**, produce about 75% less heat and last up to ten times longer.
- **House wrap resists water and air infiltration** while still allowing the building to “breathe” and permitting water vapors to escape.
- All systems include a **programmable digital thermostat** per zone.
- **Green Choice** and National Appliances Energy Conservation Act certified and approved quick recovery **water heaters** included.
- **“Green Labels Plus” Shaw Carpeting**, pad and adhesives as certified by the Carpet and Rug Institute, ensures the lowest chemical emissions possible, thus increasing indoor air quality. Shaw nylon carpeting is also a “Cradle-to-Cradle” product -- it can be **recycled** back into the raw material to make new carpets.
- All **windows are low-e**, high performance thermal double-pane with capillary tubes and are **Energy Star rated.**
- Low flow Mansfield toilets and Delta shower heads and faucets are **“Water Sense Certified,” saving as much as 40%** over standard fixtures.
- Insulated fiberglass exterior doors.
- **Greenguard Indoor Air Quality Certified insulation** reduces indoor air contaminants and promotes a better indoor environment.
- **Drywall** paper facing is made from **recycled materials.**
- **Solar roofing system**
